It is the core of our identity and the signature for all our communications.

If is absolutely necessary, an alternative version (witout tagline) can be used.

#### **Exclusion Zone**

The logo exclusion zone is equal to the widtht of the F present on our wordmark

## **Vertical & Responsive versions**

Our Logo has different versions that can be used by the designer.

On applications were the space is limited and is not possible to use the full version we can rely on these minimal reduced versions.
